**Conduit Systems, Inc. Enhances Email Filtering for SPAM and Viruses**

Lincoln, RI, August 3, 2006 - Conduit Systems, Inc., a leading provider of Outsourced IT support and an Application Service Provider, today announced it will be adding SecurenceMail to its suite of email solutions. The SecurenceMail solution will be available to all of Conduit's ASP clients, as well as Conduit's traditional client-base.

Securence is a leading global provider of email and web-filtering software for business, educational and government organizations. Their unique anti-spam and anti-virus solution, SecurenceMail, which is deployed as a service or appliance, helps protect companies and employees by scanning email and eliminating threats, such as viruses, worms, malicious content and attachments, and other junk mail, before reaching the end-user.

SecurenceMail provides real-time protection from the latest email threats through the use of high-tech signature-based filtering technology and 24/7 monitoring systems — all backed by world class customer service. SecurenceMail can be implemented immediately and requires no integration, migration or upfront costs.

With redundant fail-over capabilities that are load balanced between multiple redundant N+1 data centers, the Securence enterprise messaging security platform guarantees 99.99% availability with the lowest false-positive rate in the industry.

SecurenceMail is trusted by over 4 million customers worldwide, including Coldwell Banker, ShopNBC, TCF Banks, Kemps Foods, RE/MAX International, ERA Real Estate, Mesaba Airlines, Jostons, Century21, Malt-O-Meal Corporation, Panera Breads, Interstate Companies, and many other business, government, and non-profit organizations.

**SecurenceMail Stats:**

- Highest capture rate of spam in the industry, averaging 94% of customer's total mail flow to be quarantined, captured, and safely removed without the risk of false positives
- Full anti-virus protection included featuring Norman Securities
- Significant bandwidth savings
- Increased efficiencies from cleaner mail environment
- Powerful, yet simple-to-use web-based admin tools
- Real-time reporting of message flow with full stats and averages
- Stealth deployment options for risk-free and easy evaluations
- Monthly licensing with no long-term contract commitment
- The best cost-to-value ratio in the industry

## **Email Filtering Deployment Options:**

### Option #1: Enterprise Gateway

#### *Advantages include:*

- Remote protection from massive spam waves and malicious virus attacks — ensuring the integrity of your local network
- Immediate deployment with zero hardware or software requirements
- Remote firewall protection with SMTP lockdown
- Secondary mail caching, ensuring your email is safe in the event mail is undeliverable to your internal network
- Significant reduction in IT and HR management and administration of spam-related issues
- Significant bandwidth savings resulting from an average capture rate of +94% of mail traffic

### Option #2: On-Site Appliance

#### *Advantages include:*

- Installed at customer's site
- Eliminates mail server authentication process
- Setup in a redundant fail-over configuration
- Contained network security
- Configurable to most security policies
- Continuously maintains the most updated spam and virus signatures

## **Pricing & Terms:**

- Pricing based on # of email users within a given domain
- No setup fees required
- Full anti-virus protection included
- 24/7 technical support included
- 30-day no-obligation trial included
- No complex or binding contracts
- Monthly billing statements
- Term-agreement discounts available
